Address
Thoothukudi, Tamil Nadu, India

Date of Birth
15/06/2000

Education
Kamaraj College of Engineering and Technology
- **Bachelor of Engineering in Computer Science**
- July 2017 – July 2021

Skills
- C# and .NET Core 6
- MSSQL Server
- Version control with Git
- Frontend frameworks: Angular and React
- JavaScript and TypeScript
- Cloud services: Azure

Work Samples
- GitHub

Ramkumar M
Full Stack Developer

Summary
Full stack developer with over 3+ years of experience in microservices development and user interface design. Proficient in C#, React, Angular, Dotnet Core, and Azure, delivering robust software solutions. Expertise in translating business requirements into effective software applications. Open to opportunities in both front-end and back-end development.

Experience
Cognizant Technology Solutions (December 2021 – Present)

CVS Health
- **Backend Developer (.Net Core):** Developed and maintained 4+ backend microservices using .NET Core and C#, adhering to SDLC and clean code practices.
- Created a reusable NuGet package using C# for NET application to connect with Azure App Configuration and Key Vault and integrated with 12 applications,
- Facilitated secure management of over 500+ configuration keys and secrets.
- Reduced configuration duplication by 60%
- Achieved 100% reduction in configuration-related security findings post-implementation as per CheckMarx reports.
- Monitored production support by analyzing Splunk logs, identifying root causes, and resolving post-deployment issues.
- Migrated 70+ applications from SVN to git and created a pipeline setup in Jenkins for automated build and deployment and improving CI/CD efficiency by 70%.

World Bank Group
- Engaged in a mentorship program, successfully completed a case study.
- Developed unit test cases in Angular using jasmine to improve the code coverage by above 85% and maintain high code quality.
- Worked on Routing, Service, Observable to develop UI screens and connecting with backend API.
- Practiced agile principles in development, contributing to daily stand-ups, sprint planning and retrospectives.

Programmer Analyst Trainee

- Learned new emerging technologies and took initiative to offer technical direction and creative solutions.
- Immersed into a six-month full-stack development training provides a platform for continuous learning and growth.
- Collaborated effectively with a team to develop a case-study Demonstrated with Lead, highlighting the practical implementation and functionality of the project.
- Concluded the demo with a constructive Q/A session with lead and answered efficiently for queries, ensuring the understanding of the presented case study, and ended with discussion of potential improvements

Certifications

- AZ-204: Developing Solutions for Microsoft Azure (Jan 2025)
- Full Stack Engineer Accreditation in Cognizant (October - November 2023)
